Accredited Lead Safety Auditor Training

Minerva Consulting Group has been conducting the Accredited Lead Safety Auditor Course since 1999. Our course has been conducted in Australia, New Zealand, Fiji and South Africa with over 1,600 participants. Minerva's Accredited Lead Safety Auditor Course will provide participants with the knowledge and skills to prepare, undertake and report on an OHS management system audit. Participants learn to collect objective evidence and evaluate an organisation's OHS management system against audit criteria and recommend workplace safety improvements.

Target Audience

Minerva's Exemplar Global* Accredited Lead Safety Auditor course is for individuals who wish to become internal or external auditors of Occupational Health and Safety Management Systems (OHSMS). This course provides training and assessment in Exemplar Global* OHS auditing competencies.

This course is ideal for -

- Individuals who want to become internal or external (third party) auditors of occupational health and safety (OHS) management systems.
- Individuals who are seeking Registration as Accredited OHS Auditors.
- Individuals who want to conduct OHS Certification Audits such as AS/NZS 4801 or SafetyMAP.
- Individuals with Quality or Environmental auditing skills who want to add OHS auditing skills.
- Auditors operating under Australian State and Territory Self Insurance Workers Compensation Schemes and the New Zealand Accident Compensation Corporation programme.
- Safety managers, safety officers, safety co-ordinators, safety committee members and health and safety representatives who wish to upgrade their skills and qualification, and increase their career options.

Participants should have completed at least secondary education (or equivalent) and appropriate work experience, which contributes to the development of skills and understanding in some or all of the following:

- OHS management systems and day-to-day workplace safety.
- WHS acts, regulations, codes of practice, standards and rules.
- Safety inspections, hazard identification surveys and risk assessments.

* Exemplar Global is the new name of RABQSA International.

Accredited Lead Safety Auditor Course

Accredited Lead Safety Auditor Training Competencies

Exemplar Global Competency Standards define a specification of performance, detailing the skills, knowledge and attitudes required to audit effectively. The Minerva Accredited Lead Safety Auditor Course provides training in the skills of auditing and then assesses participants against two core competency units (Auditing and OHS) and one elective unit (Team Leading).

Competencies

Minerva is accredited by Exemplar Global to deliver, assess and certify against the following competency elements:

➤ ***RABQSA – AU Management Systems Auditing***

This is a core competency unit for all management system auditors. It covers the generic knowledge and skills required for all management system auditing described in the International Standard Guidelines for management systems auditing AS/NZS ISO 19011:2014. This competency unit is a guide for any person involved in auditing management systems (including OHS, quality, and environmental auditing) and is a requirement for all auditors seeking certification with RABQSA International.

➤ ***RABQSA – OH Auditing OHS Management Systems***

This competency unit is a guide for any person involved in auditing OHS management systems and is a requirement for all auditors seeking OHS auditor certification.

➤ ***RABQSA – TL Leading Management System Audit Teams (Optional and only available to participants experienced in OHS)***

This competency unit is a guide for any person involved in leading a management system audit team. It assesses the ability to coordinate an audit team and communicate with all parties and is essential for those seeking Lead Auditor certification.

Upon successful completion of the course, participants will have demonstrated competency to:

1. Understand the application of the principles, procedures and methods of auditing.
2. Understand the conduct of an effective audit in the context of the auditee's organisational situation.
3. Understand the application of the regulations, and other considerations that are relevant to the audit, the management system, and the conduct of the audit.
4. Practice personal behaviours necessary for the effective and efficient conduct of a management system audit.
5. Understand OHS laws, principles, codes of practices, and standards.
6. Identify OHS hazards that are reasonably expected to occur for that business type or industry.
7. Assess the risk of identified hazards in the context of the organisation's OHS management system.
8. Assess the effectiveness of methodologies to control OHS hazards.
9. Assess the OHS roles and responsibilities within the context of the organisational environment.
10. Determine the adequacy and effectiveness of an OHS management system.

- Optional Lead Auditor competencies that are only available to participants experienced in WHS.

Edition #:1	Revision #:1	Issue date: 24/03/2014	Author: GC	Reviewed by: SC	Authorised by: SC	Review date: 24/03/2016
-------------	--------------	------------------------	------------	-----------------	-------------------	-------------------------

Accredited Lead Safety Auditor Course

11. Establish and plan the activities of an audit team.
12. Communicate effectively with the auditee and audit client.
13. Organise and direct audit team members.
14. Prepare and complete the audit report.
15. Use remote auditing methods.

Course Content

Minerva training courses are renowned for utilising activity-based learning principles with participants active throughout the training. This course includes hazard identification activities, role-plays, case studies and more. The cornerstone of the Accredited Lead Safety Auditor course is a training audit so the participants learn by doing the auditing task, best preparing them to conduct real WHS audits.

Course content includes:

- Minerva OHS Management System Auditing Standards;
- RABQSA Competencies and Certification Details;
- Work Health and Safety Act 2011;
- Work Health and Safety Regulation 2011;
- AS/NZS ISO 19011:2014;
- National Self-Insurer Audit Tool; and
- AS/NZS 4801:2001.

Course Duration

This is a four (4) day course. The course is structured and conducted so that each participant is subjected to OHS management system audit practices and conditions. The total course time is 36 hours. There are 8 hours of face-to-face instruction on each of the 4 days. There are 2 overnight assignments (requiring approximately 2 hours each) issued on day 1 for submission on day 4. This course is run as a public course and can also be conducted as an internal course on client sites.

Course Materials

All necessary manuals, documents, templates, assessments and equipment are provided.

Mutual Recognition

Minerva accepts credentials issued by other Registered Training Organisations and other TPECS providers. Course participants seeking recognition must apply in writing and provide evidence of the qualifications / completed units of competency. It is necessary for an applicant to demonstrate that the knowledge / skills have remained relevant or current.

Recognition of Prior Learning

Minerva recognises that participants may be able to demonstrate a particular competency on the basis of prior learning or skills gained in the workforce. RPL will be granted if participants can demonstrate competency in all the assessment or performance criteria in the elements of a particular unit of competency or in the learning outcomes in a particular module. If participants believe that they are entitled to recognition of a current competency or set of competencies, they can apply to Minerva for recognition of these competencies.
